

STACY A. MALAKER, PH.D.

Yale University Chemistry Department
275 Prospect St
New Haven, CT 06511
stacy.malaker@yale.edu

EDUCATION

- Ph.D. University of Virginia**, Chemistry, Charlottesville, VA **2014**
Dissertation Title: "Enrichment and Characterization of Post-Translationally Modified Peptides for the Development of Novel Cancer Immunotherapeutics" Advisor: Donald F. Hunt
- B.S. University of Michigan**, Biochemistry, Ann Arbor, MI **2009**
University of Michigan, Anthropology-Zoology, Ann Arbor, MI

RESEARCH INTERESTS

- Developing bioanalytical techniques to explore glycosylated peptides and proteins
- Utilizing high-resolution mass spectrometry to identify novel antigens in disease states with the ultimate goal of promoting health and longevity
- Creating unique solutions to study densely O-glycosylated proteins, called mucins, by mass spectrometry

RESEARCH EXPERIENCE

Assistant Professor **2021-Present**

Department of Chemistry – Yale University (New Haven, CT)

- Developing mass spectrometry technologies to unravel the complex role of mucin-domain glycoproteins in disease
- Advising postdoctoral fellows, graduate students, and undergraduate students in scientific exploration, manuscript preparation, and science communication
- Teaching undergraduate and graduate level analytical chemistry, chemical biology, and quantitative instrumentation

Postdoctoral Scholar **2016-2020**

Department of Chemistry – Stanford University (Stanford, CA)

Advisor: Professor Carolyn R. Bertozzi

- Characterized metalloproteases that cleave mucin proteins to assist in proteomic classification and enrichment of mucin-like glycoproteins
- Operated, troubleshooted, and maintained a Thermo Orbitrap Fusion Tribrid high-resolution mass spectrometer
- Collaborated in several mass spectrometry-related projects, including bump-and-hole engineering for O-glycoproteomics, characterization of AAV viral capsid post-translational modifications, and site-localization of Siglec-7 glycan binding partners

Visiting Research Scientist **March-May 2018**

Protéomique, Réponse Inflammatoire & Spectrométrie de Masse– Université de Lille1 (Lille, France)

Advisors: Professors Michel Salzet et Isabelle Fournier

- Developed protocols for on-tissue glycan and glycopeptide imaging of canine glioma tissues by MALDI imaging mass spectrometry (IMS)
- Operated three MALDI-IMS instruments, including: Bruker UltraFlex, Bruker RapiFlex, and Thermo MALDI-Orbitrap
- Investigated macrophage reactivation through proprotein convertase 1/3 inhibition

Postdoctoral Research Associate **2014-2016**

Graduate Research Associate **2010-2014**

Department of Chemistry – University of Virginia (Charlottesville, VA)

Advisor: Professor Donald F. Hunt

- Developed phenylboronic acid solid phase extraction enrichment procedure to selectively isolate, enrich, and identify glycosylated MHC class I and II associated peptides
- Operated and maintained three low-resolution (LTQ) and four high-resolution mass spectrometers (Thermo Fusion Tribrid, LTQ-Velos Elite, LTQ-Orbitrap, LTQ-FTICR)

- Analyzed CAD, HCD, and ETD MS2 spectra by *de novo* sequencing, manual spectra interpretation, and validation of computer-based search algorithm results (Mascot, OMSSA, Byonic)

Visiting Research Scientist

April-May 2014

School of Immunity and Infection – University of Birmingham (Birmingham, United Kingdom)

Advisor: Professor Mark Cobbold

- Isolated human leukocyte antigen (HLA)-associated peptides from normal and tumor lung tissue samples
- Performed 7-day interferon- γ enzyme-linked immunospot (ELISpot) assays to measure immunogenicity of peptide antigens
- Executed intracellular cytokine staining (ICS) to assess memory T-cell responses

Peptide Synthesis Chemist

2005-2010

Advisor: Dr. Henriette Remmer

Protein Structure Facility – University of Michigan (Ann Arbor, MI)

- Manufactured custom peptides including synthesis, purification, and quality control
- Operated multiple peptide synthesizers in addition to analytical and preparatory scale HPLCs
- Analyzed peptide samples via ESI-MS on an LCQ and MALDI-TOF for quality control
- Prepared and analyzed client protein samples for N-terminal sequencing via Edman degradation

PATENTS

7. Methods Employing Mucin-Specific Proteases. Carolyn R. Bertozzi, **Stacy A. Malaker**, Kayvon Pedram, and D. Judy Shon. US Provisional Patent Number 17/291,376.
6. Identification of class I MHC associated glycopeptides as targets for cancer immunotherapy. Donald F. Hunt, Jeffrey Shabanowitz, **Stacy A. Malaker**, Mark Cobbold, and Sarah Penny. US Provisional Patent Number 15/750,607.
5. Target peptides for immunotherapy and diagnostics. Donald F. Hunt, Jeffrey Shabanowitz, **Stacy A. Malaker**, Victor H. Engelhard, Angela Zarling, Kara L. Cummings, Rebecca C. Obeng, and Mark Cobbold. Patent Number US09561266.
4. Composition useful for treating or preventing cancer and melanoma in patient comprises synthetic target peptides. Donald F. Hunt, Jeffrey Shabanowitz, **Stacy A. Malaker**, Victor H. Engelhard, Angela Zarling, Kara L. Cummings, Rebecca C. Obeng, and Mark Cobbold. Patent Numbers WO2014036562-A2, WO2014036562-A3, CA2883569-A1, AU2013308409-A1, EP2897631-A2, US2015224182-A1, HK1212237-A0, US9561266-B2, US2017333541-A1.
3. Composition for treating a proliferative disease comprises a tetanus peptide and synthetic target peptides. Donald F. Hunt, Jeffrey Shabanowitz, **Stacy A. Malaker**, Victor H. Engelhard, Angela Zarling, Kara L. Cummings, Rebecca C. Obeng, and Mark Cobbold. Patent Number WO2015034519-A1.
2. Composition for treating and/or preventing cancer, e.g., leukemia comprises Class I Major Histocompatibility Complex associated glycopeptides. Donald F. Hunt, Jeffrey Shabanowitz, **Stacy A. Malaker**, Mark Cobbold, and Sarah A. Penny. Patent Numbers WO2017027403-A1; CA2995103-A1; AU2016306304-A1.
1. Composition useful for treating hepatocellular carcinoma and esophageal cancer, comprises synthetic target peptides comprising specific amino acid sequences. Donald F. Hunt, Jeffrey Shabanowitz, Paisley T. Myers, Mark Cobbold, Nico Buttner, **Stacy A. Malaker**, Sarah A. Penny. Patent Number WO2017192969-A1.

HONORS AND AWARDS

2021	Human Proteome Organization Early Career Researcher Manuscript Competition – Finalist
2021	Royal Society for Chemistry - Chemistry Biology Interface Division Horizon Prize
2021	American Society for Biochemistry and Molecular Biology (ASBMB) Early Career Faculty Award
2021	Rising Stars in Proteomics and Metabolomics: 40 under 40
2019	Society for Glycobiology Annual Conference Travel Award
2019	Gordon Research Conference in Glycobiology; Poster Award
2018	Helena Anna Henzl-Gabor Young Women in Science Travel Grant
2018	SUMS Research Symposium Poster; First Place
2018	France-Stanford Center for Interdisciplinary Studies Visiting Junior Scholar Fellowship
2017-2019	NIH F32 Ruth L. Kirschstein National Research Service Award (NRSA)
2017-2018	NIH T32 Stanford School of Medicine Immunology Training Grant (Declined)
2017	Helena Anna Henzl-Gabor Young Women in Science Travel Grant
2016	Stanford University Mass Spectrometry Seed Grant
2016	National Research Council (NRC) Research Associateship Award (Declined)
2015	University of Virginia CGS/ProQuest Distinguished Dissertation Nominee

2015 University of Virginia Post Doc Symposium Oral Presentation; Third Place
2013-2014 Achievement Rewards for College Scientists (ARCS), Danaher Scholar
2014 University of Virginia 3 Minute Thesis; First Place
2014 Huskey Research Symposium Oral Presentation; First Place
2014 Washington-Baltimore Mass Spectrometry Discussion Group Travel Award
2014 Robert J. Huskey Travel Fellowship Recipient
2013 Huskey Research Symposium Poster; First Place
2013 Pratt Fellowship
2010-2013 University of Virginia Chemistry Department Fellowship
2010 Alpha Chi Sigma Presidential Award
2009 University of Michigan Angell Scholar
2007-2009 University of Michigan Honors

RESEARCH SUPPORT

Current

2021-2026 Yale Science Development Fund

Dedicated funds for the purchase mass spectrometers
Unrestricted funds for personnel and research expenditure

2021-2026 Projet de recherche international INSERM edition 2020

GhostGly aims to study, in the physiopathology of cancer, the function of a recently discovered new class of proteins (Alternative Proteins or AltProts) which are issued from alternative translation frames. In this context, we will use MS-based methodology to identify protein partners of AltProts.

2021 Yale Endowed Postdoctoral Fellowship in the Biological Sciences

One year of support for a postdoctoral associate to investigate the immune mucinome

2021 Yale SEAS/Science Program to Advance Research Collaboration (SPARC)

In collaboration with Noah Palm, we received \$25K seed funding to spearhead research investigating how mucin structure is altered in inflammatory bowel disease.

Completed

2017-2019 NIGMS National Research Service Award, F32

PI: Stacy A. Malaker

Title: An enzymatic approach to study cancer-associated cell-surface glycoproteins: exploration of mucin-degrading bacterial metalloproteases.

Description: Aberrant glycosylation is a universal feature of cancer and contributes to the ability of malignant cells to evade the immune system. The mechanism by which this occurs is not well understood, likely due to the challenges associated with studying glycosylation. The proposed research aims to develop methods that help identify glycosylated targets on tumor cells that contribute to immune suppression.

2017-2018 NIH T32 Stanford School of Medicine Immunology Training Grant (Declined)

2016 Stanford University Mass Spectrometry Seed Grant

2016 National Research Council (NRC) Research Associateship Award (Declined)

2013-2014 Achievement Rewards for College Scientists (ARCS), Danaher Scholar

2013 University of Virginia Pratt Fellowship

2010-2013 University of Virginia Chemistry Department Fellowship

 12. Invited speaker: **Stacy A. Malaker**. Enzyme toolkit for exploration of the mucinome. Australian Proteomics Society: Lorne Proteomics Symposium. 08 February, 2020. Lorne, Australia. *Invited by Nicholas E. Scott*
 11. **Stacy A. Malaker**, D. Judy Shon, Nicholas M. Riley, Kayvon Pedram, and Carolyn R. Bertozzi. Enzyme toolkit for selective enrichment and analysis of mucin-domain glycoproteins. Society for Glycobiology Annual Meeting. 03 November, 2019. Phoenix, AZ.
 10. Invited speaker: **Stacy A. Malaker**. Enzyme toolkit for selective enrichment and analysis of mucin-domain glycoproteins. Rising Stars in Chemical Biology Symposium. 20 September, 2019. Salt Lake City, UT. *Invited by Michael S. Kay*
 9. Invited speaker: **Stacy A. Malaker**, Kayvon Pedram, Judy Shon, and Carolyn R. Bertozzi. Mucin-selective protease StcE enables analysis of human cancer-associated mucins. University of Copenhagen Center for Glycomics. 05 April, 2019. Copenhagen, Denmark. *Invited by Adnan Halim*
 8. **Stacy A. Malaker**, Kayvon Pedram, and Carolyn R. Bertozzi. Stanford University Mass Spectrometry Research Symposium. 04 October, 2018. Stanford, CA.
 7. **Stacy A. Malaker**, Kayvon Pedram, and Carolyn R. Bertozzi. A mucin-specific protease improves mass spectrometric analysis of mucin-type O-glycoproteins. American Society for Mass Spectrometry Annual Conference on Mass Spectrometry and Allied Topics; Glycopeptides and Glycoproteins. 07 June, 2018. San Diego, CA.
 6. Invited speaker: **Stacy A. Malaker**. Investigating aberrant glycosylation in cancer using mass spectrometry: Insight for cancer immunotherapy design. ACS National Meeting, ACS Award in Analytical Chemistry: Symposium in honor of Donald F. Hunt. 03 April, 2017. San Francisco, CA. *Invited by John R. Yates III*
 5. **Stacy A. Malaker**, Kayvon Pedram, Carolyn R. Bertozzi. Uncovering the glycocalyx: insight from a bacterial mucinase. Stanford University ChEM-H Postdoc Retreat. 02 May, 2107. Sonoma, CA.
 4. **Stacy A. Malaker**, Sarah A Penny, Mark Cobbold, Jeffrey Shabanowitz, and Donald F. Hunt. Identification and Characterization of Tumor-Specific Glycopeptides for the Development of Novel Cancer Immunotherapeutics. UVA Postdoc Research Symposium. 01 May, 2015. Charlottesville, VA
 3. **Stacy A. Malaker**, Sarah A Penny, Dina Bai, Weihang Wang, Mark Cobbold, Jeffrey Shabanowitz, and Donald F. Hunt. New Methodology for the Enrichment and Characterization of O-GlcNAcylated Peptides. Washington-Baltimore Mass Spectrometry Group. 23 June, 2014. Columbia, MD.
 2. **Stacy A. Malaker**, Sarah A Penny, Dina Bai, Weihang Wang, Mark Cobbold, Jeffrey Shabanowitz, and Donald F. Hunt. New Methodology for the Enrichment and Characterization of O-GlcNAcylated Peptides. ASMS Annual Conference on Mass Spectrometry and Allied Topics; Post-translational Modifications: Isolation, Enrichment, and Derivatization. 16 June, 2014. Baltimore, MD.
 1. **Stacy A. Malaker**, Sarah A Penny, Mark Cobbold, Jeffrey Shabanowitz, and Donald F. Hunt. New Methodology for the Enrichment and Characterization of O-GlcNAcylated Peptides. Huskey Research Exhibition; Cancer, Infectious Disease, Drug Design. 18 March, 2014. Charlottesville, VA.

POSTER PRESENTATIONS

18. **Stacy A. Malaker**, Nicholas M. Riley, D. Judy Shon, Kayvon Pedram, and Carolyn R. Bertozzi. Revealing the human mucinome. New England Glyco-Chemistry Day. 16 July, 2021. Virtual conference from New Haven, CT. **Selected for short talk**
17. **Stacy A. Malaker**, Nicholas M. Riley, D. Judy Shon, Kayvon Pedram, and Carolyn R. Bertozzi. Revealing the human mucinome. NIH & FDA Glycoscience Research Day. 01 June, 2021. Virtual conference from New Haven, CT.
16. **Stacy A. Malaker**, Nicholas M. Riley, D. Judy Shon, Kayvon Pedram, and Carolyn R. Bertozzi. Revealing the human mucinome. RSC Chemical Biology Symposium 2021. 10 May, 2021. Virtual conference from New Haven, CT.
15. **Stacy A. Malaker**, Nicholas M. Riley, D. Judy Shon, Kayvon Pedram, and Carolyn R. Bertozzi. Novel mucinomics strategy reveals molecular signatures of cancer in cellular systems and ovarian cancer patient ascites fluid. US HUPO Annual Conference. 10 March, 2021. Virtual conference from New Haven, CT. **Selected for lightning talk**
14. **Stacy A. Malaker**, Jusal Quanico, Antonella Raffo Romero, Firas Kobeissy, Soulaïmane Aboulouard, Dominique Tierny, Carolyn R. Bertozzi, Isabelle Fournier, Michel Salzet. On-tissue spatially-resolved glycoproteomics guided by N-glycan imaging reveal global dysregulation of canine glioma glycoproteomic landscape. Midwest Carbohydrate Symposium. 20 November, 2020. Virtual conference from Stanford, CA. **Selected for short talk**
13. **Stacy A. Malaker**, Jusal Quanico, Antonella Raffo Romero, Firas Kobeissy, Soulaïmane Aboulouard, Dominique Tierny, Carolyn R. Bertozzi, Isabelle Fournier, Michel Salzet. On-tissue spatially-resolved glycoproteomics guided by N-glycan imaging reveal global dysregulation of canine glioma glycoproteomic landscape. Society for Glycobiology Annual Meeting. 10 November, 2020. Virtual conference from Stanford, CA. **Selected for short talk**
12. **Stacy A. Malaker**, Jusal Quanico, Antonella Raffo Romero, Firas Kobeissy, Soulaïmane Aboulouard, Dominique Tierny, Carolyn R. Bertozzi, Isabelle Fournier, Michel Salzet. On-tissue spatially-resolved glycoproteomics guided by N-glycan imaging reveal global dysregulation of canine glioma glycoproteomic landscape. Stanford University Mass Spectrometry Research Symposium. 28 October, 2020. Virtual conference from Stanford, CA.
11. **Stacy A. Malaker**, Judy Shon, Kayvon Pedram, Nicholas M. Riley, and Carolyn R. Bertozzi. Enzyme toolkit for selective enrichment and analysis of mucin-domain glycoproteins. Society for Glycobiology Annual Meeting. 3 November, 2019. Phoenix, AZ. **Selected for SFG Travel Award and short talk**
10. **Stacy A. Malaker**, Judy Shon, Kayvon Pedram, Nicholas M. Riley, and Carolyn R. Bertozzi. Enzyme toolkit for selective enrichment and analysis of mucin-domain glycoproteins. Stanford Microbiome Symposium. 4 September, 2019. Stanford, CA.
9. **Stacy A. Malaker**, Judy Shon, Kayvon Pedram, Nicholas M. Riley, and Carolyn R. Bertozzi. Enzyme toolkit for selective enrichment and analysis of mucin-domain glycoproteins. Mass Spectrometry in Health and Life Sciences: Molecular and Cellular Proteomics. 19 August, 2019. San Francisco, CA.
8. **Stacy A. Malaker**, Judy Shon, Kayvon Pedram, Nicholas M. Riley, and Carolyn R. Bertozzi. Enzyme toolkit for selective enrichment and analysis of mucin-domain glycoproteins. ASMS Annual Conference on Mass Spectrometry and Allied Topics; Glycoproteins I. 05 June 2019. Atlanta, GA.
7. **Stacy A. Malaker**, Kayvon Pedram, Michael J. Ferracane, Barbara A. Bensing, Eliot C. Woods, Jessica R. Kramer, Ulrika Westerlind, Oliver Dorigo, and Carolyn R. Bertozzi. A mucin-specific protease improves mass spectrometric analysis of mucin-domain glycoproteins. Keystone Symposium: Proteomics and its Application to Translational and Precision Medicine. 09 April, 2019. Stockholm, Sweden.
6. **Stacy A. Malaker**, Kayvon Pedram, Michael J. Ferracane, Barbara A. Bensing, Eliot C. Woods, Jessica R. Kramer, Ulrika Westerlind, Oliver Dorigo, and Carolyn R. Bertozzi. The mucin-selective protease StcE enables molecular and functional analysis of human cancer-associated mucins. Gordon Research Conference: Glycobiology. 12 March, 2019. Barga, Italy. **Selected for GRC Poster Award**
5. **Stacy A. Malaker**, Kayvon Pedram, and Carolyn R. Bertozzi. A mucin-specific protease improves mass spectrometric analysis of mucin-type O-glycoproteins. Stanford University Mass Spectrometry Research Symposium.

04 October, 2018. Stanford, CA. **Selected for SUMS First Place Poster Award**

4. **Stacy A. Malaker**, Michael J. Ferracane, Florence R. Depontieu, Angela L. Zarling, Jeffrey Shabanowitz, Dina L. Bai, Victor H. Engelhard, Suzanne Topalian, and Donald F. Hunt. Identification and Characterization of Complex Glycosylated Peptides Presented by the MHC Class II Processing Pathway in Melanoma. American Society for Mass Spectrometry Annual Conference on Mass Spectrometry and Allied Topics; Glycoproteins I. 07 June, 2016. San Antonio, TX.
3. **Stacy A. Malaker**, Sarah Penny, Jeffrey Shabanowitz, Mark Cobbold, and Donald F. Hunt. Enrichment of O-GlcNAcylated Peptide Antigens as Novel Candidates for Cancer Immunotherapy. Achievement Rewards for College Scientists Award Reception. 23 October, 2013. Washington, D.C.
2. **Stacy A. Malaker**, Andrew W. Dawdy, Sarah Penny, Dina Bai, Peng Wu, Jeffrey Shabanowitz, Mark Cobbold, and Donald F. Hunt. Enrichment of O-GlcNAcylated Peptide Antigens as Novel Candidates for Cancer Immunotherapy. UVA Chemistry Department Third Year Poster Session. 11 April, 2013. Charlottesville, VA.
1. **Stacy A. Malaker**, Andrew W. Dawdy, Jennifer G. Abelin, Sarah Penny, Dina Bai, Peng Wu, Jeffrey Shabanowitz, Mark Cobbold, and Donald F. Hunt. Identification of Novel Peptide Antigens as Candidates for Cancer Immunotherapy. UVA Huskey Research Symposium. 03 April, 2013. Charlottesville, VA. **Selected for First Place Poster Award**

SELECTED MENTORSHIP, SERVICE, AND DIVERSITY OUTREACH

- **Mentor, Women in Science at Yale (WISAY) Postdoc Mentoring Program** **2021 – present**
I meet once per month to mentor ~4-6 female postdocs from Yale. As a mentor, I am advising postdocs in their career development, helping to prepare them for independent careers, and assisting in the preparation of their application materials for academic jobs.
- **Mentor, Females in Mass Spectrometry (FeMS) Mentorship Program** **2020 - present**
Small groups meet once per month to mentor ~10-15 mentees from around the world for 6 months. As a mentor, I have shared my experiences as a woman in the field of mass spectrometry and on the academic job market. I have also advised students and postdocs in their career development.
- **Awards Committee, Females in Mass Spectrometry (FeMS)** **2021 - present**
A subgroup of FeMS organizes awards for students and postdocs in the mass spec field; we develop ideas for the awards, target group for the award, advertise and also select awardees.
- **Session Co-Organizer, "Advances in Mucin Analysis" PittCon 2022** **March 2022**
Co-organized the "Advances in Mucin Analysis" symposium for PittCon 2022 with Rebecca Whelan (Notre Dame). Together, we were responsible for developing the symposium theme, content, and application to PittCon organizers. We also invited speakers and will be responsible for running the symposium next March.
- **Session Chair, PacifiChem 2021** **December 2021**
Co-chaired the "New Frontiers in Biological Mass Spectrometry" session with John Yates III (Scripps). Invited by Yates to chair the session; responsible for selecting abstracts and introducing speakers.
- **Society for Glycobiology Mentoring Session** **November 2021**
Served as a mentor for undergraduate students, graduate students, and postdocs looking forward to the next steps in their academic career. Mentoring continued throughout the meeting by helping those new to the field navigate networking and poster sessions.
- **Panelist, Job Seeker Panel for Stanford Jumpstart Your Academic Career** **September 2021**
Served as a panelist for the course "Jumpstart Your Academic Career" at Stanford University. Graduate students and postdocs looking to enter the academic job market asked questions about careers and job searching in academia, with a focus on STEM fields.
- **Panelist, FeMS Job Interviewing Panel** **May 2021**

Served as a panelist for FeMS. Undergraduate students, graduate students, and postdocs looking to enter the academic job market asked questions about careers and job searching in academia, with a focus on R1 Institutions.

- **Undergraduate Poster Judge, ASBMB Annual meeting** **April 2021**
Served as a poster judge for the ASBMB Annual Meeting. Met with three undergraduate students, judged posters, evaluated presentation skills, and provided feedback to those in the competition.
- **Interviewee, "Random Walks" Podcast** **March 2021**
The Random Walks Podcast that seeks to convey the diverse perspectives of people in academia to undergraduate students in Mumbai, India. In my interview, I shared my experiences as a first-generation college student and provided advice to the audience about starting careers in academia.
- **Session Chair, US HUPO Annual Meeting** **March 2021**
Co-chaired the "Stem Cell Proteomics and Chemical Proteomics in Drug Discovery" session with Melanie Patterson. Invited by Ying Ge (Wisconsin) to chair the session; responsible for selecting abstracts and introducing speakers.
- **Host, Women in Science at Yale (WISAY) "Academic Chats"** **January 2021**
The Academic Chats are a series of virtual one-hour meet-ups for graduate students and postdocs to discuss topics related to the academic job market with someone who has recently obtained an academic job. I hosted an event in January 2021 and answered questions from Yale affiliates about my recent job search.
- **Proposal Judge, ENVISION by WiSTEM** **January 2021**
Served as a proposal judge for ENVISION Winter 2020 Competition. Women in STEM is a student-run, nation-wide organization that strives to support female high school students interested in STEM careers by providing members with networking and mentorship opportunities. ENVISION is a semester-long proposal-writing competition wherein Women in STEM members must work in teams of four or less to write a research proposal.
- **Faculty Representative, Yale Chemistry Diversity and Climate Committee** **2020 - present**
As a faculty member, I help with new initiatives for the department, for example: creating posters and social media to celebrate diversity in our department, organizing anti-racism seminars, compiling outreach/mentoring/recruiting opportunities for the department website, organizing a seminar on Individual Development Plans. We also discuss community discussions on diversity and community values to continue a commitment to DEI within the department.
- **Faculty Representative, Yale Chemistry Visiting Day Committee** **2020 - present**
Help to organize and plan the two sets of virtual visiting days (Feb 11/12 and March 11/12) for prospective graduate students. We also are responsible for generating video content and operation of the visiting days.
- **Faculty Representative, Yale Chemistry Graduate Admissions Committee** **2020-present**
Responsible for reviewing, scoring, and giving feedback on graduate applications in the chemical biology track. Worked with several other professors to provide recommendations to the larger chemistry community.
- **Panelist, Alpha Chi Sigma Professional Development Panel** **November 2020**
Served as a panelist for Alpha Chi Sigma, Alpha Beta Chapter. Undergraduate students looking to enter the academic job market asked questions about careers and job searching in academia, with a focus on R1 Institutions.
- **Faculty Representative and Emcee, 50WAY150 Women in Chemistry** **November 2020**
The symposium was a celebration of women's contributions to chemistry and the history of women chemists at Yale. In the symposium, we recognized these and other groundbreaking women inside and outside Yale with a series of short inspirational presentations. My role as a faculty member was to help assist graduate students in organizing the symposium. I also served as the event emcee.
- **Organizer, ASMS Emerging Talent Special Webinar Series** **November 2020**
The event was a weeklong online program to feature Emerging Talent within the mass spec community. As an organizer, I was responsible for selecting postdocs and graduate students to be featured in the webinar series, as well as facilitating the webinars. Finally, I provided advice on faculty job searches in a panel event.
- **Interviewee, ATHENA "College Insider" Podcast** **November 2020**

ATHENA is a special outreach program founded by the Women in STEM Initiative (WiSTEM) that focuses on female students from minority-dominant and under-resourced high schools. In my interview, I shared my experiences as a first-generation college student and provided college advice to the audience.

- **Member, Stanford ChEM-H DEI Club** **2020 – 2021**
This bi-weekly journal club focuses on topics related to BIPOC and the structural barriers to success that they face, as well as issues related to DEI, generally. Some goals for these meetings include identifying instances of racial injustice in our own lives, as well as developing tools to become anti-racist.
- **Panelist, New R1 Faculty for Yale Chemistry Professional Development** **August 2020**
Served as a panelist for the Yale Professional Development Network in chemistry. Graduate students and postdocs looking to enter the academic job market asked questions about careers and job searching in academia, with a focus on R1 Institutions.
- **Panelist, Job Seeker Panel for Stanford Jumpstart Your Academic Career** **May 2020**
Served as a panelist for the course "Jumpstart Your Academic Career" at Stanford University. Graduate students and postdocs looking to enter the academic job market asked questions about careers and job searching in academia, with a focus on STEM fields.
- **Poster Judge, Stanford University Mass Spectrometry Symposium** **October 2019**
Served as a judge for graduate and postdoc posters presented at the annual SUMS Symposium at Stanford. Provided feedback and scored posters to pick winners of the symposium.

TEACHING EXPERIENCE

Chemical Biology and Bioanalytical Chemistry Laboratory (CHEM 355L)

Spring 2022

Yale University Department of Chemistry (New Haven, CT)

- The goal of the Chemical Biology and Bioanalytical Chemistry Laboratory is to involve students in the challenge and excitement of instrumentation analysis before such research opportunities might normally be available. Students work in teams and are assigned an unknown protein. They express, purify, and characterize their assigned protein via affinity chromatography, NMR, X-ray scattering, and mass spectrometry. This course is heavily reliant on the Chemical and Biophysical Instrumentation Center (CBIC), where students get hands-on experience with instruments. The semester culminates with students writing a manuscript in JACS format, followed by a conference-style poster session.

Fundamentals of Chemical Biology (CHEM 419)

Fall 2021

Yale University Department of Chemistry (New Haven, CT)

- Chemical biology is a rapidly developing field at the interface of chemical and biological sciences. This subject deals with how chemistry can be applied to manipulate and study biological problems using a combination of experimental techniques ranging from organic chemistry, analytical chemistry, biochemistry, molecular biology, biophysical chemistry, and cell biology. The purpose of this course is to teach students the core skills that are used by scientists at the interface of chemistry and biology. The course will transition into Chemical Biology II, where students will learn more about therapeutic applications of chemical biology.

Biochemistry Laboratory Teaching Assistant

2010-2011

University of Virginia Department of Chemistry (Charlottesville, VA)

- Assisted in the design and implementation of students' research experiments that explore proteins from the hyperthermophilic bacterium *Thermatoga maritima* in order to characterize their unknown functions
- Supervised and instructed students in biological chemistry techniques including: UV spectroscopy, SDS-PAGE, cell culture, and protein expression

REVIEWING ACTIVITY

- Journal for the ImmunoTherapy of Cancer
- ACS Nano
- Journal of the American Chemical Society
- Chemical Science
- Cell Chemical Biology
- Frontiers Immunology
- Analytical Chemistry
- Analytical Chimica Acta

- Biochemical Society Transactions
- Journal of Organic Chemistry
- ACS Chemical Biology
- Biochemical Journal
- RSC Advances
- ACS Omega
- Analytical and Bioanalytical Chemistry
- Journal of Chromatography B
- Journal of Insect Science

PROFESSIONAL AFFILIATIONS AND COURSEWORK

- American Society for Biochemistry and Molecular Biology – Member (2021- Present)
- US HUPO – Member (2021 – Present)
- Human Proteome Organization – Member (2020-Present)
- Society for Glycobiology – Member (2019-Present)
- ChemRxiv – Research Associate (2019-Present)
- American Chemical Society – Member (2016-Present)
- American Society for Mass Spectrometry – Member (2014-Present)
- Alpha Chi Sigma – Brother (2006-Present)
- Yale Faculty Coaching (June-August, 2021)
- Yale/NIH Mentor Training for Faculty (May-June, 2021)
- Yale Science & Labs Learning Community (February, 2021)
- ACS New Faculty Workshop (August, 2020)
- ACS Reviewer Lab (November, 2020)
- Glycomics and Glycoproteomics Training Course (October, 2017)
